**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (previously presented) An interface for coupling to a wireless device, comprising:  
a plurality of buttons for entering information;  
a circuit board disposed behind the plurality of buttons;  
at least one multicolor LED disposed on the circuit board;  
a connector disposed on the circuit board for connecting the interface to the wireless device; and  
a selector for allowing a user to define a color of light for emission by the at least one multicolor LED;  
wherein the interface is detachably coupled to the wireless device.
2. (Cancelled) \
3. (Original) The interface of claim 1, further comprising:  
a light pipe for allowing light emitted from the at least one multicolor LED to be emitted from the plurality of buttons, the light pipe located between the at least one multicolor LED and the plurality of buttons.
4. (Cancelled)
5. (Original) The interface of claim 1, wherein the plurality of buttons comprises twelve buttons, the twelve buttons representing the twelve standard DTMF buttons.

Docket No. CE10238JI220

6. (Original) The interface of claim 1, wherein each of the at least one multicolor LED comprises a tricolor LED for emitting any one of red light, green light, and blue light.

7. (previously presented) A wireless device comprising:  
a wireless device interface for communication with a wireless network;  
a user interface for coupling user input to the wireless device, the user interface including:  
a plurality of buttons for receiving user input from a user;  
at least one multicolor LED, being located behind the plurality of buttons, for emitting light that is visible from in front of the plurality of buttons;  
a connector for connecting the user interface to the wireless device;  
a circuit board for mounting the at least one multicolor LED and the connector;  
a light pipe for allowing light emitted from the at least one multicolor LED to be emitted from the plurality of buttons, the light pipe located between the at least one multicolor LED and the plurality of buttons; and  
a selector for allowing a user to define a color of light for emission by the at least one multicolor LED;  
wherein the interface is detachably coupled to the wireless device.
